Thanks Rebecca,

I'm copying my colleague Chad who has been hearing via Glencore, EPA, and the community how they expect an agreement in place this week sometime.

We're a little concerned about not getting notice on this before it goes out public. We would appreciate some notice since Senator Tester has put a lot of faith in EPA publicly on this issue and played a lead role in bringing Glencore back to the table by supporting a priority listing. Of course, the AOC is a good route to take at this juncture, but we don't want to get a similar surprise like Frenchtown. Senator Tester has been much more engaged in CFAC and there have been some significant battles.

So far, we're getting different information from various levels of EPA and Glencore, so it would be very helpful if we could get direct updates on the status from your office before it hits the press. There are those who criticize every move EPA does lately and that narrative will not be helpful to any of us. We also have local leaders asking Senator Tester to publicly support the AOC, which is difficult with the level of information we have. Local government seems to have details we don't have and it's difficult to offer support like that in the dark.

Thanks,
Erik

Hi Erik,

Sorry I didn't get back to you Friday, but I don't have any updates for you. We do not yet have a signed agreement, but are close. I will be sure to keep you informed.

Thanks,
Rebecca

Thanks, whatever you have will be helpful. My boss has been quite involved. I know since I asked you, my legislative director asked EPA HQ similar questions.

Erik

Hi Rebecca,

My office just heard a rumor Glencore and EPA signed an Administrative Order of Consent regarding the Columbia Falls Aluminum Company. Can you provide information and a copy of the agreement, if that's accurate?

Thanks,
